

WANTED: SOFTWARE ENGINEER / PROJECT LEAD

```
// Hello
if (unhappyWithYourJobSituation() === true) {
    unhappyWithYourJobSituation().stop();
    readThisJoinUs();
}
```

What? Complevo?

If you are searching for a company that offers start-up-advantages like agile and lean management, short decision paths, Club Mate, table tennis and a great team atmosphere with benefits of established companies (such vintage fashions as safe workplace, successful positioning, steadily growing success) - then you are at Complevo.

We offer...

... embedded in "sexy" frontends.

What else? Esteem, flexible working time, fair payment, good working conditions, team events, a great international team & much more. Find out.

You offer ...

We are searching for an all-round professional who feels at home in all the three areas:

CUSTOMER // CONCEPT // DEVELOPMENT & TEST

You combine analytical thinking with a good instinct for what the customer wants. Beside that, you can structure requirements, develop the frame (procedure / user interaction) and implement that with your team.

... embedded with (let's say some) social skills – you are our (wo)man!

Let's come to the small print.

For this job, we work with the following:

- **CONCEPTS & ARCHITECTURES:**
 - // Single Paged Apps
 - // Modular web applications
 - // Asynchronous requests
 - // Serialization
 - // Service-based architectures
 - // Microservices
 - // JSON-REST-APIs
- **FRAMEWORKS & LIBRARIES:**
 - // .Net (Core)
 - // React, Angular2, Material Design
- **DEVELOPMENT ENVIRONMENTS:**
 - // Visual Studio
 - // Packet Managing
 - // Versioning
- **LANGUAGES:**
 - // C#
 - // Javascript

At Complevo we are always open for new technologies and thankful for your personal input and experiences. So, if you don't have experiences with all the above-mentioned, no worries. Go on, trust your and our instinct.

Still interested? - Yay!

Then contact us at jobs@complevo.de

See you soon.
