

COMPLEVO is an established Berlin-based company. As experts in the application-oriented implementation of mathematical optimization, COMPLEVO develops modern planning software. Our mission is to help our customers to benefit from our know-how in order to solve the most complex problems. Our customers are primarily in the automotive industry.

Our international team is as heterogeneous as our approaches to solving complex problems. To support our team in Berlin as soon as possible, we are currently looking for a full-time

.NET BACKEND DEVELOPER (f/m/x)

ROLE AND RESPONSIBILITIES

You will support our developer team of 4-6 people to analyze and implement technical, business or IT processes. Endowed with a hands-on mentality, you will design, build and deploy backend as well as frontend services. Your tech stack range comprises ASP.NET, React/Angular/Redux/Webpack, JavaScript, HTML and CSS. You feel comfortable in a cross-functional team, where team members can rely on your creativity as well as your communication and problem-solving skills.

SKILLS

- ASP.NET Core
- React / Angular
- Docker
- Microservices

ADDITIONAL SKILLS

- Git
- REDUX and SAGA
- Microservices Architecture

WE AT COMPLEVO

We put people first. We offer the advantages of a start-up company, including agile and lean management, short decision paths, and a supportive team atmosphere. However, you will not miss the benefits associated with a larger company, such as job security, successful market positioning, and steadily growing success. We are always open to new technologies and approaches, and grateful for any input and experience. So, if you don't have the full range of essential skills and experience listed above, no worries. Go on, trust (y)our instinct. Please send your resume and earliest entry date to anne.raabe@complevo.de.
