

Our dedicated international team is as heterogeneous as our approaches to solving complex problems. To support our team in Berlin, we are currently looking for a full-time freelancer to work as a

.NET SOFTWARE DEVELOPER (f/m/x)

ABOUT THE PROJECT

The project consists of multiple web-based platforms for different target groups, with a permanently available range of services, built in a state of the art and agile development process. The platforms are cutting-edge and elegant, complex and yet simple.

ROLE AND RESPONSIBILITIES

You will support our 6-8 person team of developers to analyze and implement technical, business, and IT processes. Equipped with a hands-on mentality, you will design, build and deploy backend as well as frontend services. Your tech stack range comprises ASP.NET, React/Angular/Redux/Webpack, JavaScript, HTML and CSS. You feel comfortable in a cross-functional team, where team members can rely on your creativity as well as your communication and problem-solving skills.

If you identify with the above mentioned, please send your CV to jobs@complevo.de.
